

## **MOBILE PURE AIR DUST EXTRACTORS**

AL-KO POWER UNIT

## A REAL ASSET AT WORK - AL-KO POWER UNIT M

## AL-KO PURE AIR DUST EXTRACTORS

Mobile extraction devices from AL-KO combine high reliability with a compact and space-saving design. They create ideal production conditions with healthy air in the workplace, are unusually quiet and help to achieve significant cost savings. All sizes are designed to offer the optimum combination of maximum extraction power and the lowest possible energy consumption. Furthermore, the tried-and-tested AL-KO OPTI JET® process guarantees filter cleaning, and consequently increased filter service life. They are delivered ready for connection, all that is required is to insert the swarf bag.

At AL-KO, we care deeply about healthy work environments and the optimal dust collection efficiency for all of your machinery.

#### The advantages for you:

- I High extraction performance
- I Compact design
- I 100% air recirculation without loss of temperature (residual dust < 0.1 mg/m³)
- I Integrated pre-separator and extendable control system
- I Optimum filter dedusting
- I Minimal noise level
- I Patented filling level control
- I Certified automatic extinguishing device, easy to maintain
- Dust compartment for dust-free container change (optional: safety lock of the containers)
- I Freely configurable assemblies, exchangeable and expandable

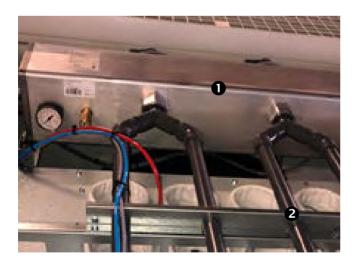

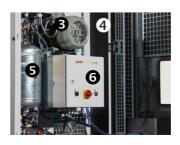

- Large air surge tank with fast diaphragm valves for optimum JET filter cleaning and lowest use of compressed air
- Filter bag made of antistatic polyester needle felt material (BGIA-tested for dust class M) as standard with snap ring lock for easy handling

- 3 Energy-efficient motors according to IE3 as standard
- Sound-insulated air recirculation for optimum noise emission values
- Low-maintenance automatic fire extinguishing system with manual and automatic operation (standard with POWER UNIT 250, 300 and 350)
- PLC control from size 160 onwards; manual and automated operation possible; can be extended with many options (e.g. machine recognition; slide valve control; frequency controlled operation and many more functions besides)
- Viewing window for easy fill level check
- Ergonomically shaped clamping lever for simple container locking

# THE AL-KO HIGH-PERFORMANCE FILTER SYSTEM "AL-KO OPTI JET"

#### Your benefits:

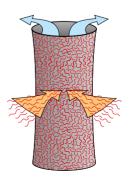

- I Raw air impacts onto the filter element from the outside
- I "Real" surface filtration by special treatment of the filter surface
- Latest BIA test certificates for dust class M
- I Improved cleaning by injection – longer filter service life
- I Optimum air permeability
- I Filter electrically conductive as standard

## AL-KO DUST COMPARTMENT

#### PRACTICAL - SIMPLE - CLEAN

The AL-KO DUST COMPARTMENT, the simple and inexpensive solution for greater cleanliness and health protection in the workplace.

#### The advantages for you:

- I Easy to operate
- I Dust-free wind-up during container changes
- I Bag removal with lifting machine
- I Optimised health protection

Release the chippings container

Push in the dust compartment

Replace the chippings container

Reinsert the chippings container and remove the dust compartment

Clamp the chippings container into place

## THE NEW PERFORMANCE CLASS

#### The advantages for you:

- I Highest extraction performance
- I Lowest energy consumption A+
- I Optimum safety
- I Compact construction

## THE NEW LEVEL OF PERFECTION

- I New technology
- I Unique design
- I Made in Germany
- I Patended air routing

AL-KO POWER UNIT 350 is the new performance class among pure air dust extractors. The powerful 17 hp **IE3 motor** extracts dust and swarf with a gigantic **flow rate of 4,980 cfm**, while being very economical in terms of consumption. Thanks to 57 filters, the AL-KO POWER UNIT 350 offers a **gigantic filter surface** of 785.8 ft<sup>2</sup> — enough to lower the residual dust content of the **air which is 100% recycled** to  $< 0.1 \text{ mg/m}^3$  (H3).

Naturally, the AL-KO POWER UNIT 350 uses tried and tested, and further improved, AL-KO OPTI JET® technology and the **integrated pre-separator** comes as standard.

While performing on a gigantic level, AL-KO POWER UNIT 350 is never noisy. The maximum sound level at a distance of one meter measures according to DIN EN ISO 11201 — **absolutely quiet 71 dB (A)** — probably the lowest figure in this class. This is not surprising as the AL-KO POWER UNIT 350 is equipped with real **sound-absorbing panels** — **as standard**.

Thanks to the unique design and the further optimised internal layout, AL-KO POWER UNIT 350 is extremely space-saving: with its dimensions of 123"x42"x93" (LxWxH) the AL-KO POWER UNIT 350 is significantly smaller than many other devices of the 300 class.

## GIGANTIC PERFORMANCE AL-KO POWER UNIT 350

- I IE 3 motor as standard
- I Max. flow rate up to 4,980 cfm
- I Approx. 785.8 ft² filter surface, residual dust content according to H3
- I Pre-separator as standard
- I 71 dB(A) at full power (according to DIN EN ISO 11201)
- I Already complies with EN 16770
- I Models with rotary lock valve tested for type examination (FSA)
- I Tested back-up flap
- I Integrated automatic extinguisher

#### **Options on request:**

- I Filter surface up to 1,571 ft<sup>2</sup>
- I Increase of expansion chamber
- I Discharge with rotary lock valve
- I Sound damper
- I Exhaust air hood
- I Clean dust compartment
- I Control options

# AL-KO EXTRACTION TECHNOLOGY – YOUR STRONG PARTNER

In Europe and across the world, thousands of customers every year choose quality products from AL-KO Extraction Technology. The enthusiasm for these products and customers' confidence in us demonstrates that even today, products bearing the "MADE IN GERMANY" label have a future — if they are consistently based on innovation and superior quality.

Look to the future with us, and as our customer and partner profit from the performance, the quality and the security offered by the AL-KO brand.
